Getting the first 300 of those carbines fabricated drove

innovation and industrialization
in South

Carolina. George
Woodward Morse,
originally from
New Hampshire,
was a machinist
and firearms

innovator, who
settled in
Louisiana in the
1840s. He
invented a

Burnside

Online Library Burnside

reliable breechloading
firearm in the
mid-1850s to
replace muzzleloaders
that were
ubiquitous
throughout the
world. Essential
to the
successful
operation of any
breechloader was

Burnside

Online Library Burnside

its ammunition,
and Morse
perfected the
first metallic,
center-fire, pre-
primed
cartridge, his
most notable
contribution to
the development
of modern
firearms. The
U.S. War
Department

Burnside

Online Library Burnside

tested Morse
rifles and
cartridges prior
to the beginning
of the Civil War
and contracted
with the
inventor to
produce the
weapons at
Harpers Ferry
Armory. However,
when the war
began, Morse, a

Burnside

Online Library Burnside

slave-holding
plantation
owner,
determined that
he could sell
more of his guns
in the South.

The South
Carolina State
Military Works
originally
designed to cast
cannon, produced
Morse's carbine

Burnside

Online Library Burnside

and modified
muskets, brass
cartridges,
cartridge boxes,
and other
military
accoutrements.
The armory
ultimately
produced only
about 1,350
Morse firearms.
For the next
twenty years,

Burnside

Online Library Burnside

Morse sought to regain his legacy as the inventor of the center-fire brass cartridges that are today standard ammunition for military and sporting firearms.

War General
In his day, Gen.

Burnside

Online Library

Burnside

Benjamin S.

Roberts was better known as a U.S. Army

combat commander than as a firearms

inventor. Yet as an inventor he

saw commercial success with his idea for

converting muzzle-loading

muskets into
efficient
breechloaders.

This is the
story of his
efforts,
beginning in
1859, to develop
the ultimate
breechloader
efforts that
would lead to
his successful
design in 1866.

Burnside

He also achieved success with his patented design for cartridges.
