The history of regional sporting events in 20th-century Asia yields insights into Western and Asian perspectives on what defines modern Asia, and can be read as a staging of power relations in Asia and between Asia and the West. The Far Eastern Championship Games began in 1913, and were succeeded after the Pacific War by the Asian Games. Missionary groups and colonial administrations viewed sporting success not only as a triumph of physical strength and endurance but also of moral education and social reform.

Sporting competitions were to shape a "new Asian man" and later a "new Asian woman" by promoting internationalism, egalitarianism and economic progress, all serving to direct a "rising" Asia toward modernity. Over time, exactly what constituted a "rising" Asia underwent remarkable changes, ranging from the YMCA's promotion of muscular Christianity, democratization, and the social gospel in the US-colonized Philippines to Iranian visions of recreating the Great Persian Empire. Based on a vast range of archival materials and spanning 60 years and 3

The wider adoption of a post-modern understanding of truth and knowledge, an acceptance of the prevalence of Orientalism inherent in much Western research, and the diminished significance of the 'local' within the rhetoric of globalization have all combined to constrain comparative and transnational research under the weight of theoretical and methodological concerns. Transnational and Comparative Research in

experience to the role of media innovation at the Olympics. Digital technology is changing everything about modern sports. Athletes and coaches rely on digital data to monitor and enhance performance. Officials use tracking systems to augment their judgment in what is an increasingly superhuman field of play. Spectators tune in to live sports through social media, or even through virtual reality. Audiences now act as citizen journalists whose collective shared data expands the places in which we consume sports news. In Sport 2.0, Andy Miah examines the convergence of

Sports and digital cultures, examining not only how it affects our participation in sport but also how it changes our experience of life online. This convergence redefines how we think of about our bodies, the social function of sports, and the kinds of people who are playing. Miah describes a world in which the rise of competitive computer game playing—e-sports—challenges and invigorates the social mandate. Miah also looks at the Olympic Games as an exemplar of digital innovation in sports, and offers a detailed look at the social media footprint

Day of the 2012 London Games, discussing how organizers, sponsors, media, and activists responded to the world's largest media event. In the end, Miah does not argue that physical activity will cease to be central to sports, or that digital corporeality will replace the nondigital version. Rather, he provides a road map for how sports will become mixed-reality experiences and abandon the duality of physical and digital.

Day and despair, tension and drama. Consequently, sport makes for a compelling film narrative and films, in turn, are a vivid medium for sport. Yet despite its regularity as a central theme in motion pictures, constructions and representations of sport and athletes have been marginalised in terms of serious analysis within the longstanding academic study of films and documentaries. In this collection, it is the critical study of film and its connections to sport that are examined. The collection is one of the first of its kind to examine the ways in which sport has
