Learning: What's The Difference

Abstract. Data mining is the search for hidden relationships in data sets. Machine learning is implementing some form of artificial “learning”,

Download Free Data Mining

where “learning”

is the ability
to alter an
existing model

based on new
information.

Businesses use
data mining
techniques to

intervention and
decision making.
But, with
machine

learning, once
the initial
rules are in
place, the
process of
extracting
information and
'learning' and
refining is
automatic, and

Download Free Data Mining

takes place
without human
intervention. In
other words, the
machine becomes
more intelligent
by itself.

What Is The Difference Between Data Mining And Machine ...
