(Good Health Guides ...

DHEA is a major marker for age and health. Its major effect in a coping person is anti-stress, meaning that the increased cortisone produced by stress is subsequently normally brought back down to baseline by a rise in DHEA. DHEA similarly has anti-diabetic action, as cortisol raises blood sugar and either spares or enhances effects of insulin.

Dhea: The Youth and Health Hormone (Good Health Guides ...

By supporting the health of epithelial cells, DHEA decreases levels of this protein and helps ensure tiny blood clots get dissolved before they can cause thrombosis, heart attacks, or strokes. Blood glucose levels: DHEA does not affect insulin levels, but it does make insulin more effective by increasing cells ' sensitivity to it.
