Designation: B633 13

Requirements regarding corrosion resistance for zinc coatings which have not been subsequently treated are specified for coatings that are tested using the
DIN 50018 - KFW 2,0 S test or the neutral salt spray test (NSS) as in DIN EN ISO 9227. Cr(VI) free passivated and sealed zinc and zinc alloy coatings are
defined in DIN 50979.

As an instructor in various finishing courses, I have frequently made the statement over the years that "In the field of metal finishing there is very little
black and white, just a great deal of grey. It is the purpose of the instructor to familiarize the student with the beacons that will guide him through this fog. "
To a very considerable extent, a handbook such as this serves a similar purpose. It is also subject to similar limitations. Providing all the required
information would result in a multi-volume encyclopedia rather than a usable handbook. In the pages that follow, you will therefore find frequent references
to other sources where more detailed explanations or information can be found. The present goal is proper guidance and the provision of the most frequently
required facts, not everything that is available. In the 13 years since the last edition, changes in the finishing industry have been profound but in one sense
have resulted in simplifying matters rather than complicating them. Because technology has advanced to a level of complexity rendering "home brew"
impractical in many cases, dependence on proprietary compounds has become common. Therefore, detailed solution compositions are often no longer
significant or even practical. It is thus more important to provide instruction about the factors that affect the choice of the most suitable type of proprietary
material.

If you're looking for a journal to track your dreams, Congratulations, it's here. Dream analysis can provide practical insight into our deepest thoughts, helping us have a better understanding of ourselves and find inner wisdom. The Daily Dream Journal provides a two-page spread to record and track your dreams. This 6x9 softcover journal contains 114s lined pages for each day of dream entries. Each entry allows space for: Time Thoughts before sleep Emotions before sleep Dream Interpretation Feeling upon awakening Comments This journal is easy to use and will allow you to document your dreams to quickly discover patterns, allowing you to achieve greater self-awareness!!!
