Q. Describes the arrangement of the cell membrane as bendable and made of many parts.

Cell Membrane Structure and Function Quiz - Quizizz

The cell membrane

Read Free Membrane

(plasma membrane) is a thin semi-permeable membrane that surrounds the cytoplasm of a cell. Its function is to protect the integrity of the interior of the cell by allowing certain substances into the cell while keeping other substances out. It also serves as a base of attachment for the cytoskeleton in some
