"The Late Middle Ages" (1300–1500) provides an overview of natural and political disasters that ravaged Europe during the 14th and 15th centuries. The Black Death, the Hundred Years' War, and the rise of weak monarchies are among the dramatic events vividly documented in this richly illustrated text. Challenging review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included.

The information and activities in this Space Exploration Resource Guide are organized in roughly three sections: the Space Travel Simulation; Our Solar System and Beyond; and Energy, Force, and Motion in Space. Learning opportunities in each section are planned to engage children and teachers in experiences that allow for free exploration, concept development, and application of concepts. A classroom space shuttle simulation provides the focus for child exploration throughout the unit of study. The activities in the resource guide are not organized in a sequential, lock-step way, but rather are structured so teachers can choose from activities as if they were selecting from a menu—planning learning opportunities based on children's interests and levels of understanding. Four transparencies (print books) or PowerPoint slides (eBooks) are included to engage students in discussion and reinforce the concepts presented in the book.

Exploring Literature is a complete teaching unit designed to give you everything needed to help students understand and appreciate fine literature. This exciting approach includes classroom-tested activities sure to save you hours of valuable preparation time.
