Specialist Periodical Reports provide systematic and detailed review coverage of
progress in the major areas of chemical research. Written by experts in their
specialist fields the series creates a unique service for the active research chemist,
supplying regular critical in-depth accounts of progress in particular areas of
chemistry. For over 80 years the Royal Society of Chemistry and its predecessor,
the Chemical Society, have been publishing reports charting developments in
chemistry, which originally took the form of Annual Reports. However, by 1967 the
whole spectrum of chemistry could no longer be contained within one volume and
the series Specialist Periodical Reports was born. The Annual Reports themselves
still existed but were divided into two, and subsequently three, volumes covering
Inorganic, Organic and Physical Chemistry. For more general coverage of the
highlights in chemistry they remain a 'must'. Since that time the SPR series has
altered according to the fluctuating degree of activity in various fields of chemistry.
Some titles have remained unchanged, while others have altered their emphasis
along with their titles; some have been combined under a new name whereas
others have had to be discontinued.
