The Manual sets out an internationally agreed framework for the compilation and reporting of statistics on international trade in services in the broad sense. It addresses the growing need, including in international trade negotiations and agreements, for more detailed, comparable, and comprehensive statistics on this type of trade in its various forms. The recommendations will enable countries to progressively expand and structure the information they compile in an internationally comparable way. The Manual conforms with and explicitly relates to the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual. It is published jointly by the United Nations, European Union, IMF, OECD, UNCTAD, and World Trade Organization.

Rachael O'Brien, a girl from the cornfields of Canton, Ohio, returns to college in North Carolina in her old Ford. Before the engine has cooled she finds herself in a passionate lip-lock with the man she's been fantasizing about, making sophomore year seem full of promise. But Rachael soon falls on the wrong side of the most feared professor on campus, who happens to be her advisor, intern boss, and the teacher of an art history course she can't drop. Having applied for a scholarship Rachael needs high marks, but tensions with the professor become dicey and she fears her grade is in jeopardy when it seems they've become romantic rivals. Rachael will have to think fast and suck it up if she wants to secure the financial aid she desperately needs. Staying on top of classes, navigating murky relationship waters, roommate drama, a psychics warning, and a terrifying encounter from the past are just some of Rachael's challenges. She will have to use cunning and wit to avoid being SHELLED AND SHUCKED and live to see junior year.

While tornadoes have occasionally been spotted elsewhere, only the central plains of North America have the perfect conditions for their creation. For the early settlers the sight of a funnel cloud was an unearthly event. From Ben Franklin's early experiments to the great storm war of the nineteenth century to heartland life in the early twentieth century, Sandlin re-creates with vivid descriptions some of the most devastating storms in America's history, including the Tri-state Tornado of 1925 and the Peshtigo fire tornado, whose deadly path of destruction was left encased in glass. Drawing on memoirs, letters, eyewitness testimonies, an
