Psychology: European Edition is a landmark new textbook for introductory psychology modules. Written by world-renowned researchers who are also award-winning popular science authors, the book introduces students to the core areas of this broad and fast-moving field with irresistible enthusiasm, insight, and humour. Psychology: European Edition features: • Totally up-to-date research coverage and a modern neuroscientific approach • A storytelling style that deftly weaves the historical with the contemporary • An innovative approach that highlights how insights into the mind are often derived from slips and errors - what the authors term *mindbugs* • Comprehensive coverage without unmanageable detail • A full range of pedagogical features, including Hot science boxes on cutting-edge research, and The real world boxes on psychology in everyday life • Fully adapted and new content for European students written by an eminent psychologist at Bristol University, UK who is also a renowned communicator of science. The Psychology: European Edition online package includes an extensive array of high-quality materials for lecturers and students. Lecturer materials include: • 2500 question testbank: multiple choice and true/false questions adapted by Bruce Hood for the European Edition • Worth Digital Media Archive: 64 video clips of classic and more recent experiments, interviews with psychologists and 3D brain models • Lecturer manual: containing lecture suggestions, discussion questions, class exercises, essay questions with guideline answers, a media planner and a BFS syllabus matrix • PowerPoint slides complete with figures and tables for every chapter. Student materials include: • PsychSim 5: an online activity program placing students in simulated research as the experimenter or subject, and dynamic demonstrations illustrating key psychological principles • Multiple choice questions, video and web assignments and weblinks, written and compiled by Bruce Hood • Additional information on studying psychology for Scandinavian students.

This highly anticipated new introductory psychology textbook takes a fresh approach to the teaching of psychology by focusing on 'mind bugs' - foibles of the mind that are intrinsically fascinating and provide fundamental insights into how the mind works.

This widely used, enthusiastically received textbook is the work of one of the most accomplished author teams in introductory psychology, each a distinguished educator and researcher. Together, they offer an approachable, engagingly written survey of the field's main ideas, filled with unusual stories, memorable examples, and lots of humor to captivate all kinds of students. Features include: "Hot Science" highlighting important and interesting new research "The Real World" highlighting applications of psychological research to real world contexts "Other Voices" offering excerpts of great writing about psychology and showing how important psychology is to public discussion "Changing Minds" questions at the end of the chapter that ask students to confront a scenario using information from the chapter. The new edition has been reshaped for the classroom chapter by chapter. Sections in each chapter now have specific Learning Outcomes in place, to emphasize "big picture" concepts and guide student learning. There is also new boxed feature called 'A World of Difference' highlighting important research on diversity and individual differences.

This is the textbook only without Launchpad. With an author team equally at home in the classroom, in the lab, or on the bestseller list, this book is written to keep students turning the pages. It offers expert coverage of psychology's scientific foundations, but communicates with students in a style that's anything but that of a typical textbook. Introducing Psychology keeps the level of engagement high, with quirky and unforgettable examples, and reminders throughout that the critical thinking skills required to study psychology will serve students well throughout their lives. The fourth edition has been completely retooled for the classroom. For the first time, each chapter section begins with Learning Outcomes to guide students' learning. These outcomes represent the big picture, so readers come away with more than a collection of facts. The new edition also includes the new 'A World of Difference' feature, which highlights interesting and important research on individual differences such as sex, gender, culture and ethnicity in understanding the breadth of psychology. Introducing Psychology can also be purchased with the breakthrough online resource, LaunchPad, which offers innovative media content, curated and organised for easy assignability. LaunchPad's intuitive interface presents quizzing, flashcards, animations and much more to make learning actively engaging.

This bestselling textbook portrays the latest developments in psychology in a charismatic style that will inspire a lifelong love of science. As top researchers, committed educators, and writers who hit the bestsellers lists, this extraordinary author team keeps students captivated page after page, story after story, with Ingrid Johnerde bringing in Canadian research and examples. The new edition takes a closer look at the role psychology plays in our society, with new material in Chapter 2 that looks at the truth about psychological science, the rate of replication in published studies, and how critical thinking is foundational in science and life. Chapter 1 presents a new look at the history of the science with unexpected stories and new insights into its surprising origins. Each chapter has been fully updated with Canadian-based research and examples to portray a field that is constantly evolving and illuminating the world today. Combined with LaunchPad, including the LearningCurve adaptive quizzing system, the new Fifth Edition is a powerful way to introduce students to the science of psychology.
