Today, nearly \$2.29 trillion is involved in socially responsible investing-one out of every 10 dollars under professional management in the United States-and that investing increasingly focuses on a "triple bottom line," with environmental stewardship elevated to a third metric for measuring corporate performance.

The Green Bottom Line | FarSounder

Green Infrastructure: A Triple Bottom Line Approach to Environmental Justice. The guiding principle of environmental justice is that all people, regardless of race, color, national origin, or income are entitled to equal protection from environmental risks. Across the United States, a variety of socioeconomic metrics are used to identify communities with environmental justice needs, but all of these communities have one thing in common: populations that suffer a disproportionate share of the ...

Green Infrastructure: A Triple Bottom Line Approach to ...

Environmental sustainability takes the view that the less impact your business has on the environment, and the fewer natural resources you consume, the longer and more successful your business will be. Controlling your Environmental bottom line means managing, monitoring, and reporting your consumption of resources, including waste, and also any impacts from business practices including emissions, pollution and toxic waste.
