Introduction to Rule-based Applications

In computer science, a rule-based system is used to store and manipulate knowledge to interpret information in a useful way. It is often used in artificial intelligence applications and research. Normally, the

Bookmark File PDF Using Rule Based Design In

term rule-based system is applied to systems involving human-crafted or curated rule sets. Rule-based systems constructed using automatic rule inference, such as rule-based machine learning, are normally excluded from this system type.

program using this computational model. It may be a complete development environment, or a framework that can work with a traditional platform. Most of what I've seen in recent years are tools that are designed to fit in with an existing platform.

RulesEngine - Martin Fowler

Bookmark File PDF Using Rule Based Design In

Rule-based programming paradigm emerged at that time as ways to implement systems that appear to think and reason like human beings. Examples of rule-based systems are expert systems that have the knowledge of a doctor or a tax advisor and can answer complex questions people would normally ask those professionals. The idea

Bookmark File PDF Using Rule Based Design In

of rule-based programming is to represent a domain expert ' s knowledge in a form called rules.
