Visualizing Geology, 4th Edition introduces students to geology and Earth system science through the distinctive mode of visual learning that is the hallmark of the Wiley Visualizing series. Readers learn that the geologic features we see and experience result from interactions among three grand cycles, which extend from Earth's core to the fringes of our atmosphere: the tectonic cycle, the rock cycle, and the water cycle.

Visualizing Nutrition teaches students to identify and connect the central elements of nutritional science using a visual approach. As students explore important nutrition topics, they are immersed in content that not only provides scientific understanding, but demonstrates relevance to their personal lives. Students are challenged and taught the decision-making skills needed to navigate the countless choices they will face in promoting their good health and preventing disease. Visualizing Nutrition's critical thinking approach with a solid underpinning of the scientific process empowers students to be knowledgeable consumers when faced with decisions about what to eat.

Visualizing Human Biology is a visual exploration of the major concepts of biology using the human body as the context. Students are engaged in scientific exploration and critical thinking in this product specially designed for non-science majors. Topics covered include an overview of human anatomy and physiology, nutrition, immunity and disease, cancer biology, and genetics. The aim of Visualizing Human Biology is a greater understanding, appreciation and working knowledge of biology as well as an enhanced ability to make healthy choices and informed healthcare decisions.
